## ABOUT ME

Hello! I'm a passionate and dedicated web developer, eager to begin my career in the tech world. Although I am a fresher, I've equipped myself with a strong foundation in web development technologies such as HTML, CSS, JavaScript, and responsive design principles. I am continuously learning and improving my skills through courses, hands-on projects, and exploring new technologies.

## PROJECTS

### • Sundown Studio Link

Project is based on html css and js.In this projects i have learned about the animation and transition how the small things can make website look beautifull and i made website responsive using media queries.

### • My Portfolio

This is my portfolio website based on html ,css, js and Bootstrap framework .Mainly used bootstrap to create my portfolio using that i achived Responsive design easily.I am using grid system in this and utility classes i have also used the little bit custom css as well and media queries for small chages.
